

## Getting Started

Included in the software CD is MEYE, a multi-platform smartphone program for connecting to your DVR.

Note: Please have the DVR configured for remote access, and the Mobile monitor feature activated.

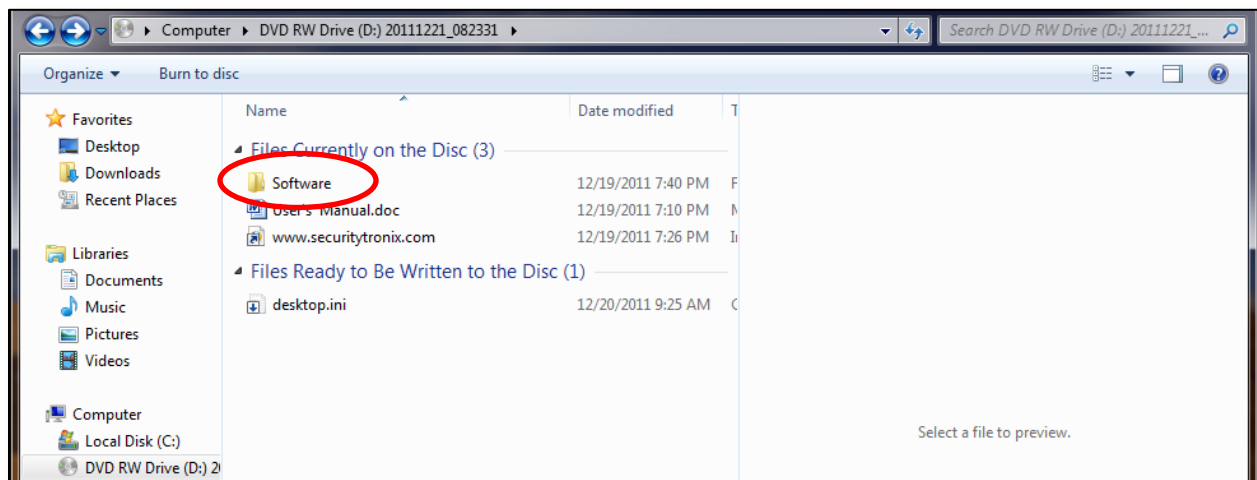

Consult your DVR's user manual for help configuring the DVR for remote access.

Information about using MEYE with the iPhone can be found at the end of this section.

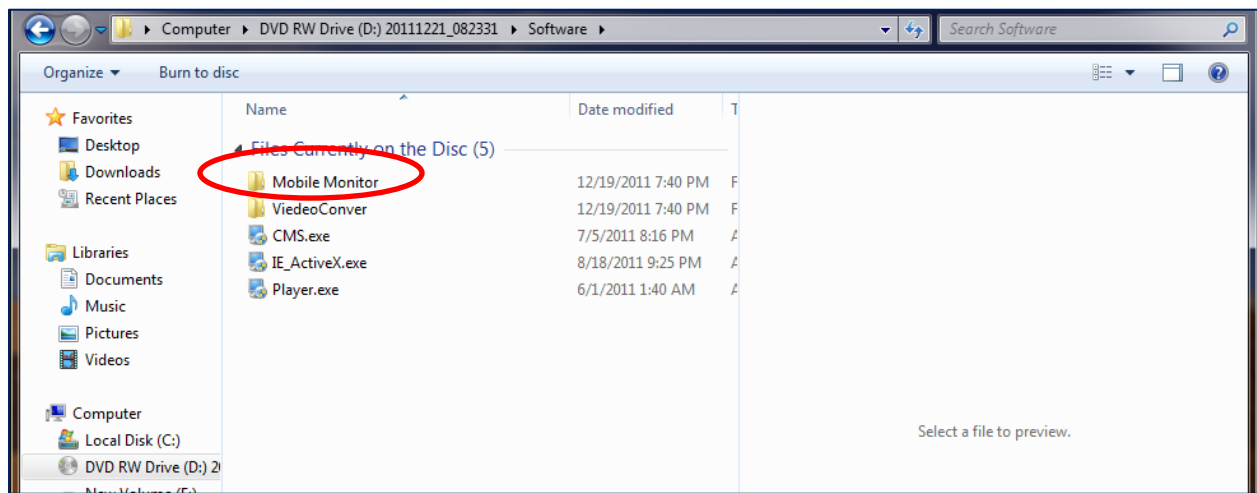

## 1. Downloading Software

Insert the CD into the computer that you connect your smartphone to.

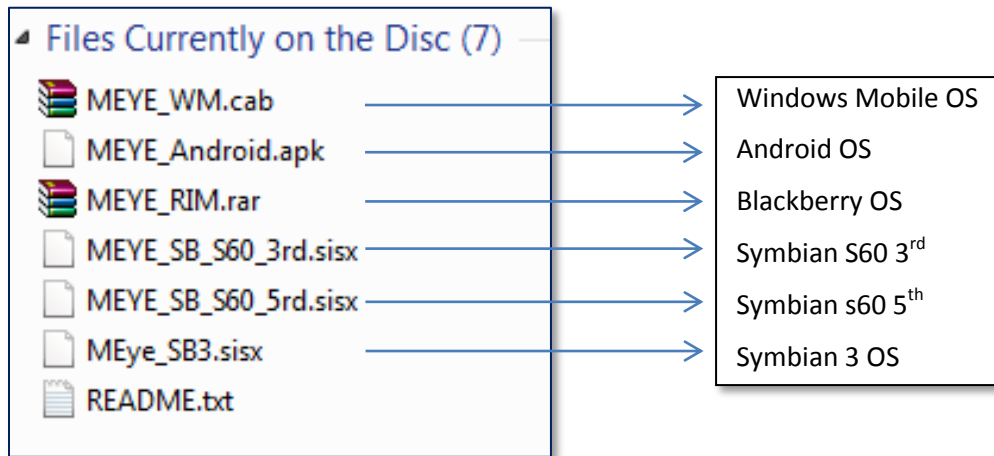

Open the folder titled "Software"

Open the folder titled "Mobile Monitor"

This folder contains the compressed versions of MEYE; please select the appropriate file for your smart-phone.

Note: The MEYE app for Blackberry OS will need to be unpacked before it can be used. Free decompression software can be found at [http://download.cnet.com/WinRAR-32-bit/3000-2250\\_4-10007677.html](http://download.cnet.com/WinRAR-32-bit/3000-2250_4-10007677.html)

## 2. Installing Software

Once the appropriate file has been downloaded, the method for installation varies depending on the type of mobile phone you are installing the program in.

### Windows Mobile OS

Connect your Windows Mobile phone to the computer, and copy the "MEYE\_WM.cab" directly to your phone.

Use the "File explorer" feature on your phone to launch the "MEYE\_WM.cab" file.

This file will then install MEYE onto your Windows Mobile Phone.

### Android OS

You may either install this app by copying it to your phone first and then launching it, or you may search the Android Marketplace for "MEYE", and install it directly to your phone. ( recommended)

### Blackberry OS

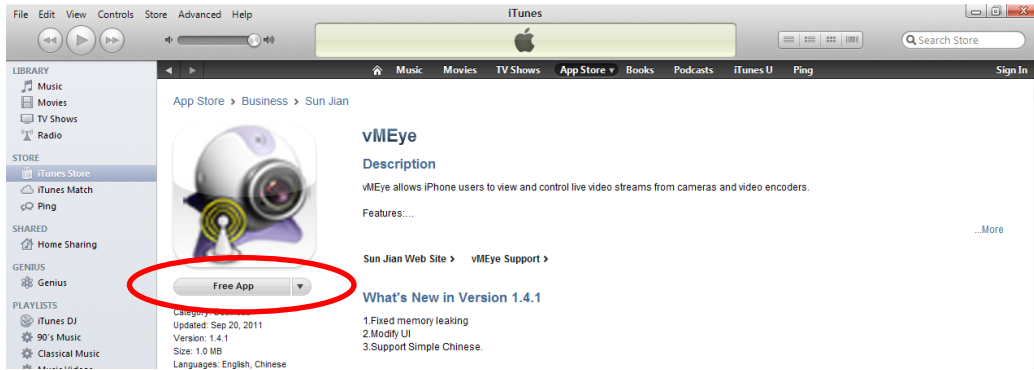

First decompress the "MEYE\_RIM.rar" file either directly into the phone, or into some removable media that your phone supports. Launch the "Explorer " app and locate the unpacked MEYE installer. This program will install MEYE onto your device.

### Symbian OS

First decompress the file that corresponds to the version of Symbian you have installed. Copy this file directly to your Phone, locate the ".sisx" file and launch it from within your phone. This file will then install MEYE onto your device.

## Apple iOS

MEYE for iPhone is only available for download from apple's APP STORE. Visit the APP store either from iTunes on your Computer, or on your phone. Search for "vMEYE", click on the "Free App" button. Please refer to iTunes help for more Information regarding downloading and installing applications onto your phone.

Additional help using MEYE can be found at [http://www.meyetech.com/upload/files/20110823\\_015439.pdf](http://www.meyetech.com/upload/files/20110823_015439.pdf)

## 3. Configuring MEYE

Launch MEYE and select the "SETTINGS" page. Enter the target DVR's WAN IP address, port, user ID, and password.

A screenshot of the MEYE Settings page. The page has a blue header with 'Back' and 'History' buttons. The title is 'Settings'. There are two main sections: 'Server Info' and 'Account Info'. Under 'Server Info', there are two fields: 'Address:' with the value '192.168.1.1' and 'Port:' with the value '34599'. Under 'Account Info', there are two fields: 'User ID:' with the value 'admin' and 'Password:' with the value '\*\*\*\*\*'. Blue arrows point from the 'Address' and 'Port' fields to a text box on the right, and from the 'User ID' and 'Password' fields to another text box on the right.

Address: Public IP of your DVR's network

Port: Use the mobile port that you have specified from within the DVR

User ID: The same login for the DVR

Password: The DVR's login password

Note: Your DVR must be configured for remote access in order for MEYE to function properly.

Consult your network administrator before making any changes to your local network.
